Linkedin: [linkedin.com/in/sowdeswaran-t-932922208](https://www.linkedin.com/in/sowdeswaran-t-932922208)

PROFESSIONAL SUMMARY

Python Developer with around **3 years** of experience in developing and maintaining web applications and backend services. Proficient in Python, Django, Flask, SQL, HTML, CSS, and JavaScript with hands-on experience in building RESTful APIs and database-driven applications. Skilled in database management using MySQL and PostgreSQL, including writing optimized SQL queries. Experienced in working with Git, Postman, and Agile development methodologies. Strong ability to develop scalable solutions, debug applications, and collaborate with cross-functional teams to deliver high-quality software. Passionate about learning new technologies and improving application performance

SKILLS

Python | JavaScript | SQL | Django | Flask | HTML5 | CSS3 | Bootstrap | MySQL | PostgreSQL | Git | GitHub | Postman | Docker | Jenkins | PyTest | Unit Testing | OOP | FastAPI | MVC Architecture | API Integration | Agile | Scrum | SDLC

EDUCATION

Bachelor of Science in Computer Science

KPR College of Arts and Science, Coimbatore
2019 – 2022

PROFESSIONAL EXPERIENCE

Python Full Stack Developer

Nov 2022 – Present

VisionQuest Solutions Private Limited

- Developed 5+ backend services and APIs using Python and Django framework.
 - Built RESTful APIs to support application features such as user management, payments, and transactions.
 - Optimized MYSQL queries improving response time by 25%.
 - Collaborated with frontend developers to integrate APIs with React and JavaScript-based UI.
 - Performed debugging, performance tuning, and code optimization to improve system efficiency.
 - Used Git and Agile methodology for version control and project collaboration.
-

PROJECTS

Giropay Payment Integration System

Domain: E-Commerce

Tech Stack: Python, Django, MySQL, REST API, JavaScript, Git

- Developed a secure payment processing system using Python and Django.
- Built REST APIs to manage checkout, payment verification, and transaction status.
- Integrated frontend payment interface using JavaScript and HTML/CSS.
- Implemented database models for order tracking and transaction records.
- Ensured secure data handling and optimized database performance.

Acadia Healthcare Management System

Domain: Healthcare

Tech Stack: Python, Flask, MySQL, HTML, CSS, JavaScript

- Developed backend services using Python Flask framework.
- Implemented modules for patient registration, appointment booking, and billing.
- Designed frontend pages using HTML, CSS, and JavaScript.
- Managed healthcare data using MySQL database.
- Implemented authentication and role-based access for secure system usage.
