I'm a Senior software engineer with seven plus (7+) years of experience in Full-Stack development on various business models.

Skills

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Frameworks & Libraries:** React.js, Redux, Angular, RxJS, Node.js, Express.js, GraphQL, Lambda, jQuery, Bootstrap, RESTFUL, JSON, AJAX, MVC, MUI, Angular Material, JWT, OAuth, multi-factor authentication, Derby.js, Racer, Tailwind
- **Database:** MongoDB, PostgreSQL, MySQL, Redis, NoSQL, SQL
- **Development Tools & Technologies:** Git, Docker, Jira, Azure DevOps, Datadog, Atlassian, Slack, Postman, PM2, Microservices, SonarQube, Unit Testing, NPM, AI Tools (Claude, GitHub Copilot, Google Copilot)

Experience

Software Engineer II

[Employ Inc](#)

Bangalore, Karnataka 03/2024 - 03/2026

- Working as a **Full-Stack Software Engineer II** and developed UI and server-side applications using **React.js, Node.js, Derby.js** and Racer.
- Handled a Recruiting Software (Lever) where I worked as a **UI lead** & managed the software development lifecycle using Agile method.
- As a UI lead engineer, I used to create detailed **Implementation Spec** & worked on AI driven development workflows.
- Experienced in Continuous Integration/Deployment Pipeline Integration, pull requests, **code reviews**, unit/integration/e2e testing.
- Collaborated with diverse region customers and development teams from US, Canada, Australia, and ASEAN countries.

Senior Engineer

[Qburst Technologies Pvt Ltd](#)

Bangalore, Karnataka 09/2021 – 02/2024

- Worked as a **Full-Stack Engineer** and developed UI and server-side applications using **React.js, Redux, and Node.js**.
- Handled a Health care project (NAPA) that's driving \$1.2 billion of revenue every year, where I worked as a **UI lead**, and managed the software development lifecycle using Agile methodologies, and completed it within an estimated time of 6 months.
- Worked as a **Senior Frontend Engineer** in a **retail store management** portal, where I **mentored** and **managed 3 junior developers**.
- Developed UI using **React TypeScript, JavaScript** & Managed the state using **Redux**. Used **Jest & React testing library** for unit testing.
- Experienced in Continuous Integration/Deployment Pipeline Integration, pull requests, **code reviews**, unit/integration/e2e testing.

Software Engineer

[Fortunesoft IT Innovations](#)

Bangalore, Karnataka 06/2020 - 09/2021

- Worked as a **backend engineer**, built server applications with **Node.js (Express, GraphQL, AWS Lambda)**
- Hands-on experience in **architecting backend** and **database systems** for business models such as **eCommerce and ERP applications**.
- Integrated **Geospatial querying** using **MongoDB** by storing data as **GeoJSON** objects and legacy coordinate pairs.
- Implemented Microsoft **SSO** authentication and built cross-platform notifications using **Firebase, AWS SNS, and Apple Push Notification**.
- Engineered **E2E serverless** payment gateway using **Stripe & Lambda**, and automated the subscription process using **Cron.js**.
- Designed a scalable database for an eCommerce application using **MySQL**. And handled complex SQL queries for quick response.
- Practiced **TDD** by writing **unit tests** with **Mocha** and **Chai**, ensuring code quality and maintainability using **SonarQube** and **Swagger**.

Software Programmer

[Osiz Technologies Pvt Ltd](#)

Madurai, Tamil Nadu 10/2018 - 06/2020

- Worked as a **MEAN stack** developer and handled E2E applications from scratch for **Cryptocurrency Trading websites** and **Chat App**.
- Created a Chat Application using **JavaScript & jQuery** to run the app in any kind of frontend framework using a script tag in **HTML**.
- Conduct product demonstration and presentation to showcase the features and benefits to the **CEO, COO, and Sales Team**.
- Designed an admin portal to handle CMS contents & **SEO** on the website & Used **Redis DB** to improve site loading performance.
- Experience in implementing **web3.js** to interact with a local or remote Ethereum node using **HTTP** and **WebSocket**.
- Built scalable UIs with **Angular (MVC)**, **HTML/CSS**, and **RxJS**, and developed **RESTful APIs** using **Node.js, Express.js, and MongoDB**.
- Designed and developed **trading algorithms** using **DSA** to ensure the performance, scalability, & ease of use for end users.

Education

Bachelor of Science

[Madurai Kamaraj University](#)

Madurai, Tamil Nadu 06/2015 - 06/2018

- Major in Information Technology (IT) passed with 71% from NPR Arts & Science College.

Mentorship/Leadership

- **Qburst - Senior Engineer:** Mentored & managed 3 junior software developers and guided them to write clean reusable codes.
- **Employ Inc - Lead UI Engineer:** Managed a team of 3 members and planned software development lifecycle using Agile methodologies & successfully completed the project on the estimated timeline.
