| <https://www.linkedin.com/in/anthonyrocky>

Objective

Full Stack Developer with **3.5 years of experience** seeking to contribute expertise in **designing, developing, and deploying** scalable web applications and REST APIs using **Python, JavaScript, Django, Flask, FastAPI, and React.js**. Strong in **database management, deployment and service management** using **Docker, AWS S3, IIS, NSSM**, and experienced in **Agile/Scrum** environments with Jira.

Experience

GB Tech Corp, Chennai

Oct 2024 - Present

Python Full Stack Senior Developer

- Designed and developed end-to-end full stack applications, delivering user-friendly interfaces and scalable backend services.
- Led development activities while ensuring adherence to best software engineering practices and coding standards.
- Performed extensive testing, debugging, and performance optimization to improve application stability and efficiency.
- Actively involved in the full software development lifecycle, from requirement gathering to production deployment.

App Innovation Technologies, Coimbatore

Aug 2022 - Sep 2024

Python Junior Developer

- Developed backend APIs and frontend interfaces, supporting multiple web and mobile applications.
- Collaborated with senior developers and cross-functional teams to deliver high-quality software solutions on time.
- Conducted testing, bug fixing, and optimization to improve application performance and reliability.
- Worked closely with clients to understand requirements and contributed to technical documentation.

Project

First Class Data Services – Data & Marketing Platform

Client: First Class Data Services – USA

Company: App Innovation Technologies

- Developed and maintained backend and frontend features using **Python, Django REST Framework, and React.js**.
- Built and integrated **REST APIs** to support web and mobile applications.
- Worked with **PostgreSQL and Elasticsearch** to manage large-scale marketing and prospect data efficiently.
- Contributed to data-driven solutions enabling **accurate targeting, lead generation, and business growth**.

QA Measures – Patient & Surgical Data Management System

Client: Greater Anesthesia Solutions – USA

Company: App Innovation Technologies

- Developed a web and mobile application (GAS) for surgeons and anesthesia providers to manage patient records and surgical details.
- Built and maintained REST APIs using Flask and Flask REST API to support mobile application integration.
- Implemented role-based access, enabling Chiefs to manage provider shifts and track surgical cases, while Providers update patient information.
- Used SQLAlchemy for database operations and worked with HTML, CSS, and JavaScript for frontend enhancements.

Vehicle Management System (ATLAS)

Client: Vehicle Management System (ATLAS)

Company: GB Tech Corp

- Developed and maintained a web-based vehicle management system for tracking and managing vehicle data.
- Built backend services using Python and FastAPI, and developed frontend interfaces with HTML, CSS, and JavaScript.
- Implemented features to calculate and monitor total vehicles, mileage, and maintenance schedules.
- Integrated modules for driver and staff attendance tracking, improving overall operational efficiency.

Line Management System (LMS) – Production & Inventory Tracking

Client: Line Management System (LMS)

Company: GB Tech Corp

- Developed a production line management system to track product duplication and monitor inventory across shifts.
- Built backend services using Python, Flask, and SQLAlchemy to manage product flow and production data.
- Implemented sub-barcode tracking to ensure accurate product monitoring throughout the production process.
- Designed a user-friendly interface with HTML, CSS, and JavaScript, improving efficiency, time management, and productivity.

Technical Skills Highlights

Programming & Frameworks: Python, Django REST API, Flask, FastAPI

Frontend Technologies: HTML, CSS, JavaScript, jQuery, AJAX, React.js

Databases & Search: PostgreSQL, MSSQL, SQLAlchemy, Elasticsearch

APIs & Data Handling: REST API, API Integrations, Web Scraping, Pandas, NumPy, Regex

Deployment & Tools: Docker, Plesk, CyberPanel, NSSM, IIS, Firebase, AWS S3, GitHub, Postman, Jira
