EXPERIENCE

Senior Software Engineer

Kellton

📅 07/2025 - Present 📍 Gurugram

AI & ETL Engineering

Technologies: **Python, FastAPI, PostgreSQL**

- **Built a production ETL system** integrating SQL Server, PostgreSQL, APIs, and SFTP to process **thousands of HR records/day** with automated scheduling, encryption, and smart error handling.
- **Developed an AI voice assistant** (online with Gemini 2.0 + offline local LLM) enabling **hands-free dashboard control** with **90%+ accuracy** and zero downtime.
- **Designed an offline-first AI architecture** using a browser-based local model, reducing **cloud costs by 60%** while maintaining full functionality.
- **Implemented a natural-language smart search engine** converting voice commands into database queries, supporting **50+ query types**.
- **Built a real-time monitoring dashboard** (Tabulator.js) with interactive filters, 25+ custom error types, email alerts, and recovery tools—**cutting troubleshooting time by 70%**.
- **Optimized performance and cost** through caching, hybrid AI switching, multi-format support (CSV/JSON/XML), structured logging, and maintaining **99.9% uptime**.

Software Engineer

Webcubator Technologies

📅 06/2023 - 05/2025 📍 Remote, India

Patient Health Platform with AI Assistant (Health Care)

Technologies: **Rust, Actix Web, AWS** (Lambda, VPC, S3, IAM), **EPIC FHIR R4**

- **Patient Health Platform with AI Assistant (Healthcare)**: Deployed high-performance FastAPI apps, integrated EPIC FHIR R4 APIs, built NLP chatbot (95%+ intent accuracy), and designed Lambda pipelines processing 10K+ monthly events
- **Rocco — Lending & Payments Platform (Fintech)**: Integrated multiple gateways, developed loan-qualification APIs, built Python-based debit collection system, launched subscription features increasing revenue by 30%.
- **Health Data Aggregation Service (Healthcare)**: Unified fitness data streams (50K+ records/day), built dashboards improving engagement by 40%, secured user docs in encrypted S3 with automated PDF delivery.

Software Engineer

Crest Data Systems

📅 08/2021 - 04/2023 📍 Pune, India

Technologies: **Python, FastAPI, VMware vSphere API, Jira REST API, Bitbucket API, Docker**

- Automated end-to-end Jira and Bitbucket ticket workflows using **REST APIs**, reducing manual effort by **60%** and accelerating change tracking across engineering teams.
- Built a Python **FastAPI** service to orchestrate the full VM lifecycle (create/update/delete) for **50+** vSphere instances, cutting provisioning time by **80%** and enabling audit-compliant infrastructure operations.
- Designed standardized, reusable workflows for code repository setup and **Jira dashboard generation**, slashing developer onboarding time by **30%** and improving consistency across teams.

PROJECTS

Big Integer Library

📅 01/2022 - 07/2022

A C++ library for large number arithmetic

- Developed a **C++ big-integer library** capable of handling numbers up to **10¹⁰⁰⁰**.
- Added support for **4 arithmetic operations** and **10+ advanced functions**.

CODING PROFILES

[LeetCode](#) [HackerRank](#) [Code chef](#) [GeekForGeeks](#)

SUMMARY

Experienced **backend engineer** specialised in building **event-driven architectures** and low-latency microservices. Proven track record of scaling systems to **100K+ TPS** on AWS. Delivers robust **production APIs**, high-throughput payment workflows, and reliable data pipelines for **Fintech** and **HealthTech** platforms.

KEY ACHIEVEMENTS

CAP Distinction – Crest Data Systems (2022)

Recognized among **top 5%** of interns for technical excellence and delivery in backend automation projects.

Runner-Up – GitHub Hackathon, The Code Geek Fest (2022)

Placed in top **2** out of **150+** teams for developing a real-time code collaboration platform in under 48 hours.

Global Rank 2253 – Google Hash Code 2021

Competed among **100K+** participants in Google's global algorithmic coding competition.

Tech Community Leader – D.Y.Patil College of Engineering (2019–2022)

Organized 5+ coding contests and technical workshops, engaging **400+ students** and growing club participation by 60%.

SKILLS

Languages

Python, Rust, JavaScript, C++

Frameworks

FastAPI, Flask, Express.js, React, Django

DevOps

AWS (Lambda, API Gateway, S3, RDS, VPC, IAM), Docker, RabbitMQ, GitHub Actions, Prometheus/Grafana, Heroku, Vercel

Databases & Messaging

MySQL, PostgreSQL, MongoDB, Redis

Architecture, Design & CS Fundamentals

System Design, Design Patterns, Microservices, Data Structures, Algorithms

Payments

Stripe, Plaid, Loan Payment Pro

Tools & Practices

Jira, Confluence, CI/CD, System Design, Microservices, Event-Driven Architecture

EDUCATION

Bachelor of Engineering

D.Y. Patil College of Engineering

📅 07/2018 - 06/2022 📍 Pune, Maharashtra
